Thinking about a change?

We recognize that the construction industry is changing at a rapid pace and we continually strive to be at the forefront. Our core **values** empower people to deliver great careers and develop creative solutions for complex problems on some of the most intricate projects. It doesn't matter what your expertise and craft is – there are no boundaries. We are a group of leading professionals with a variety of expertise: engineers, investment bankers, superintendents, estimators, software engineers, accountants, lawyers, marketing and communications consultants, sustainability professionals, and project managers. As you can see, we are a diverse bunch.

In case you're curious, here's what the industry **thinks of us** and some cool **things we have done**.

You as Electrician – ED Modular will:

- Read and understand engineering drawings and specifications to assemble components or systems
- Ensure equipment is maintained electrically following all of the defined safety procedures and that everyone working on the equipment is following these procedures, including LOTO. Ensure that all guards and safety equipment is in place and operational before turning the equipment over to the operator.
- Ability to properly use required hand tools, power tools, hoists cranes, measuring devices and testing equipment.
- Initiates troubleshooting techniques to solve quality, process and electrical problems. Must be able to properly identify problem areas with consistency and reliability, if unsuccessful in making repairs, must notify supervisor for assistance.
- Responsible to ensure housekeeping is in audit ready condition after the electrical task is completed.

Is this the right role for you?
